

# amazon echo

## setup guide

This document will explain the process of setting up an Amazon Echo unit for use with the **SMARTvoice** automation solution. Covered in this document is:

- Downloading and installing the Alexa companion app.
- Connecting the Echo unit to WiFi.
- Linking the Echo unit with your **SMARTvoice** account.

### Downloading the Alexa app—iOS (Not available on the Australian iOS store)

- Launch the iOS App Store, select the *Featured* page and tap the Apple ID button at the bottom of the page.
- Scroll to the bottom, and tap *Apple ID*.
- A pop up will appear for the iOS account, Select the *Sign Out* option.
- \*\*You may need to enter your Apple ID password for this step.
- Scroll back down to the bottom, and tap *Sign In*. Another account popup will appear.
- Select *Use Existing Apple ID* and enter the details below to sign into the American iOS store

Username: [paul@sasys.com.au](mailto:paul@sasys.com.au)

Password: **Frog3704**

\*\*Another popup will appear notifying you that you will be switched to the American iOS store.

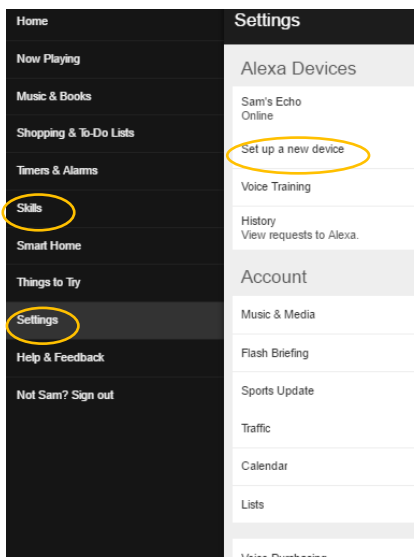

- You can now search for and install the amazon Alexa app from the store.
- Once the app has been installed on your devices follow steps 1 to 3 above and sign back into your original iOS account. You will be redirected back to the Australian iOS store however the Alexa app will remain on the device.

### Downloading the Alexa app—Android (Not available on the Australian Play store)

- Open the Settings menu on your android device and select the *Security* settings tab.
- Scroll down the page until the *Unknown sources* setting and confirm that this is enabled.
- \*\*This allows installation of apps not installed directly from the Play store.
- On the device go to the link below and download the application file:

[www.SmartVoice.com.au/resources](http://www.SmartVoice.com.au/resources)

- Once the app is downloaded open the file to begin installation. A warning will appear saying that the source of the app is unknown, select *OK* and the App will be installed.

### Setting up the amazon Echo— iOS, Android, Web browser.

- Open the Alexa app on an iOS or Android device, or go to <http://alexa.amazon.com> from your computer.
- If there is no Echo configured to that account yet the Setup process will begin automatically, otherwise select the *Settings* tab and tap the “*Set up a new device*” button.
- Follow the instructions to setup the Echo unit.
- Once the Echo unit has been setup, select the *Skills* tab inside the Alexa app and search for the **SMARTvoice** skill.
- Select the **SMARTvoice** skill and press the *Enable Skill* button in the top right corner. This will take you to the skill linking page.
- Enter your Smart Voice **customer** account details. Select *confirm* and your Echo unit will be linked for use with your **SMARTvoice** account.
