## User Guide:

### Example voice commands.

#### Audio Visual:

Portal setup: Setup in [cinema] as type: [Audio Visual], Name: [Movie]

Turn on command: **"Alexa tell Smart Voice watch cinema movie"**

or **"Alexa tell Smart Voice watch movie in cinema"**

or **"Alexa tell Smart Voice turn on movie in cinema"**

Turn off command: **"Alexa tell Smart Voice turn cinema movie off"**

Volume up/down commands: **"Alexa tell Smart Voice cinema movie volume up"**

Mute command: **"Alexa tell Smart Voice to mute cinema movie "**

Channel up/down commands: **"Alexa tell Smart Voice cinema movie channel up"**

Play/Pause/Stop commands: **"Alexa tell Smart Voice to play cinema movie "**

#### Hint

As many controls such as volume are often independent of a device commands such as volume up are often better mapped without a [Name].

For example:

A device is setup in [Cinema] as type: [Audio Visual], Name: [Movie] and the following commands are mapped: turn on, turn off, Play, Pause and Stop

Another device is setup in [Cinema] as type: [Audio Visual], Name: [TV] and the following commands are mapped to it: turn on, turn off, Channel up and Channel Down

Another device is setup in [Cinema] as type: [Audio Visual], Name: [ ] and the following commands are mapped to it: Volume up, Volume down and mute

Using this setup the following commands are available:

**"Alexa tell Smart Voice watch cinema movie"**

**"Alexa tell Smart Voice play cinema movie"**

**"Alexa tell Smart Voice watch cinema TV"**

**"Alexa tell Smart Voice cinema TV channel up"**

**"Alexa tell Smart Voice cinema volume up"**

**"Alexa tell Smart Voice mute cinema"**

Notice that the volume controls are independent of the devices and can therefore control all cinema devices.
